

Join The Academy of Our Lady of Peace Robotics Team!

Welcome to Smart Move!

Every year, FLL works with experts in the field to create a Challenge that relates to a significant real-world issue. The end result is a two-part Challenge that requires research to complete "The Project," and science and engineering to master the complex missions of "The Robot Game." It's a fun and exciting way to encourage kids' minds for ages 9-14.

Can FLL teams transform the way we look at transportation? The key to the 2009 "Smart Move" Challenge is accessing people, places, goods and services in the safest, most efficient way possible. In this journey, teams will consider many modes of transportation beyond their daily routine and streamline their options by making smart moves with our autonomous robot! The Challenge is an exercise in strategic thinking and planning.
